

Coffee Shop Website

Organisation Overview

Name: [Coffee Shop Name] - e.g., "The Brew Hub" or "Coastal Coffee Co."

Brief History: [Coffee Shop Name] is a specialty coffee shop dedicated to providing high-quality, artisanal coffee and creating a welcoming community space. Founded by [owner name] with a passion for exceptional coffee, the shop sources beans from sustainable, ethical suppliers and focuses on delivering an unhurried, considered café experience.

Mission Statement: To serve exceptional coffee in a warm, welcoming environment while fostering community connections and promoting sustainable coffee practices.

Vision Statement: To become the neighbourhood's favourite coffee destination, known for outstanding coffee quality, friendly service, and community engagement.

Core Values:

- **Quality:** Sourcing and serving only the finest coffee beans
- **Community:** Creating a space where people feel welcome and connected
- **Sustainability:** Supporting ethical and sustainable coffee practices
- **Authenticity:** Being genuine in every interaction and offering

Target Audience:

- **Primary:** Local residents and workers looking for quality coffee and a comfortable space
- **Secondary:** Coffee enthusiasts seeking specialty brews
- **Tertiary:** Event organisers and groups looking for venue bookings

Website Goals and Objectives

Specific Goals:

1. **Increase Brand Awareness:** Establish a strong online presence for the coffee shop
2. **Drive Foot Traffic:** Encourage customers to visit the physical location
3. **Streamline Ordering:** Allow customers to view the menu and place orders online
4. **Showcase Brand Personality:** Reflect the café's unique atmosphere and values
5. **Promote Events & Specials:** Share news about new menu items, seasonal specials, and events

Key Performance Indicators (KPIs):

- Increase website visitors by 30% in 3 months
- Drive 20+ online orders or table reservations per week
- Grow email newsletter subscribers by 50 in first month
- Decrease bounce rate by 20%

Current Website Analysis

This is a hypothetical coffee shop with no existing website.

Current Situation:

- No online presence
- Relies on word-of-mouth, social media, and foot traffic
- Limited ability to showcase menu, specials, and events

Opportunities:

- Establish a professional brand identity online
- Create an interactive menu and ordering system
- Build a loyal customer base through email marketing
- Showcase café atmosphere through high-quality photography

Proposed Website Features and Functionality

Essential Pages :

1. **Homepage:** Hero section with high-quality images of coffee, cozy atmosphere, seasonal specials, location and hours
2. **About Us:** Our story, values, commitment to quality, team introduction
3. **Menu:** Categorized menu with coffee, beverages, and food options (clear descriptions and pricing)
4. **Reservation/Ordering:** Online booking for table reservations and order placement for pickup/delivery
5. **Gallery:** Showcase café ambiance, latte art, décor
6. **Contact:** Location with map, hours, and contact form

Desired Functionality:

- Interactive menu with categories and filtering
- Reservation system for table booking
- Online ordering for pickup/delivery
- Newsletter signup for promotions and events
- Blog section for coffee news and updates
- Social media integration

Design and User Experience

Colour Scheme:

- Primary: Warm Beige (#F5E6D3) - Warm, inviting, natural

- Secondary: Espresso Brown (#4A2C2A) - Depth, richness, brand anchor
- Accent: Sage Green (#8BA888) - Fresh, sustainable, calming
- Highlight: Cream (#FFF8F0) - Clean, bright, readable

Typography:

- Headings: Playfair Display (Elegant, refined, matching café atmosphere)
- Body Text: Lato (Clean, readable, modern)
- Accents: Cursive style for subtle brand personality

Layout and Design Approach:

- Editorial style with generous white space for an unhurried feel
- Warm, inviting aesthetic with natural tones
- Scrolling photo mosaic on homepage showcasing the café
- Mobile-first design for seamless viewing on all devices
- User-friendly navigation

User Experience Considerations:

- Simple, intuitive navigation to view menu and place orders
- Clear calls-to-action for reservations and ordering
- Fast-loading high-quality images
- Consistent branding across all pages

Technical Requirements

Hosting: Reliable hosting with good uptime (e.g., HostAfrica, [Domains.co.za](#)) - Estimated R500-R1,000 per month

Domain: [coffeeshopname].[co.za](#)

Technologies:

- HTML5 (semantic markup)
- CSS3 (modern styling)
- JavaScript (interactive elements)
- Responsive framework (e.g., Bootstrap)
- PHPMailer for form handling
- MySQL for reservation/order data

Additional Requirements:

- SSL certificate for security

- Social media integration
- Newsletter integration
- Google Maps API for location display

Timeline and Milestones

Milestone	Duration	Description
Discovery & Planning	Week 1	Requirements gathering, mood boards, competitor analysis
Design Phase	Weeks 2-3	Wireframing, high-fidelity mockups, stakeholder review
Development	Weeks 4-6	HTML/CSS/JS coding, form integration, testing
Content Integration	Week 7	Menu population, image integration, social links
Testing & Deployment	Week 8	Cross-browser testing, performance optimization, launch
Post-Launch Support	Ongoing	Maintenance, updates, analytics monitoring

Total Timeline: 8 weeks

Budget Estimate

Item	Cost (R)
Website Development (Design + Coding)	12,000 - 20,000
Hosting (Annual)	6,000 - 12,000
Domain Registration (Annual)	500 - 800
SSL Certificate (Annual)	1,000 - 2,500
Professional Photography (Food/Ambiance)	3,000 - 8,000
Maintenance (Monthly)	500 - 1,500
Total Estimated Cost	R23,000 - R44,800
